# Shop-Easy Marketing Analysis

## Introduction to Business Problem

- ShopEasy, an online retail business, is facing reduced customer engagement and conversion rates despite launching several new online marketing campaigns. They are reaching out to you to help conduct a detailed analysis and identify areas for improvement in their marketing strategies.

**Key Points:**

- **Reduced Customer Engagement:** The number of customer interactions and engagement with the site and marketing content has declined.
- **Decreased Conversion Rates:** Fewer site visitors are converting into paying customers.
- **High Marketing Expenses:** Significant investments in marketing campaigns are not yielding expected returns.
- **Need for Customer Feedback Analysis:** Understanding customer opinions about products and services is crucial for improving engagement and conversions.

**Goals:**

- **Increase Conversion Rates:**
  - **Goal:** Identify factors impacting the conversion rate and provide recommendations to improve it.
  - **Insight:** Highlight key stages where visitors drop off and suggest improvements to optimize the conversion funnel.
- **Enhance Customer Engagement:**
  - **Goal:** Determine which types of content drive the highest engagement.
  - **Insight:** Analyze interaction levels with different types of marketing content to inform better content strategies.
- **Improve Customer Feedback Scores:**
  - **Goal**: Understand common themes in customer reviews and provide actionable insights.
  - **Insight:** Identify recurring positive and negative feedback to guide product and service improvements.

The Steps I took to approach this problem.

1) Gathered all the relevant data, including Reviews, Engagement, and Customer Journey information.
2) Cleaned and standardized using SQL Server Management Studio.
3) Performed Sentiment Analysis of the Reviews written by customers and calculated the sentiment score.
4) Imported all the files to Power BI.
5) Created an Interactive dashboard that visualized key findings and potential reasons for the lack of performance.

Shubham Trivedi

From the initial dataset, I cleaned and preprocessed to get the following Fact and Dimension table for further analysis and visualization.

Dimension tables:

1) Products: ID, Name, Price, Category
2) Customers: ID, Name, Email, Gender, Age, Country, City

Fact Tables:

1) Customer Reviews: ReviewID, Customer ID, Product ID, Review Date, Rating, Review Text
2) Engagement: ID, Content, CampaignID, Product ID, Views, Clicks, Date of Engagement
3) Journey: Journey ID, CustomerID, ProductID, Visit Date, Stage, Action, Duration

The Overview page in the dashboard:

It shows the overall visualization of all the KPIs, and also the datasets I used and the Measures I created using DAX.

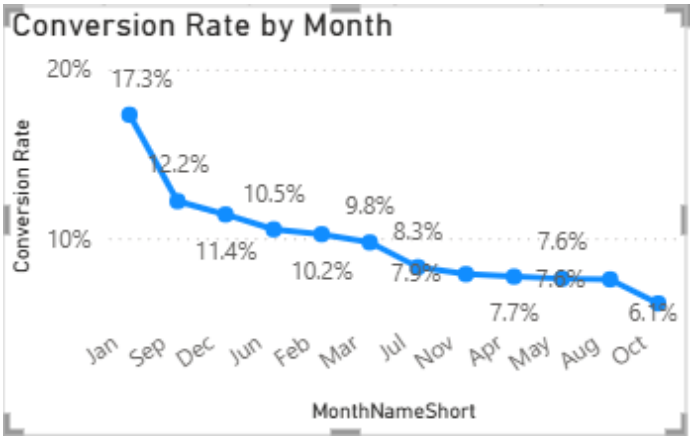
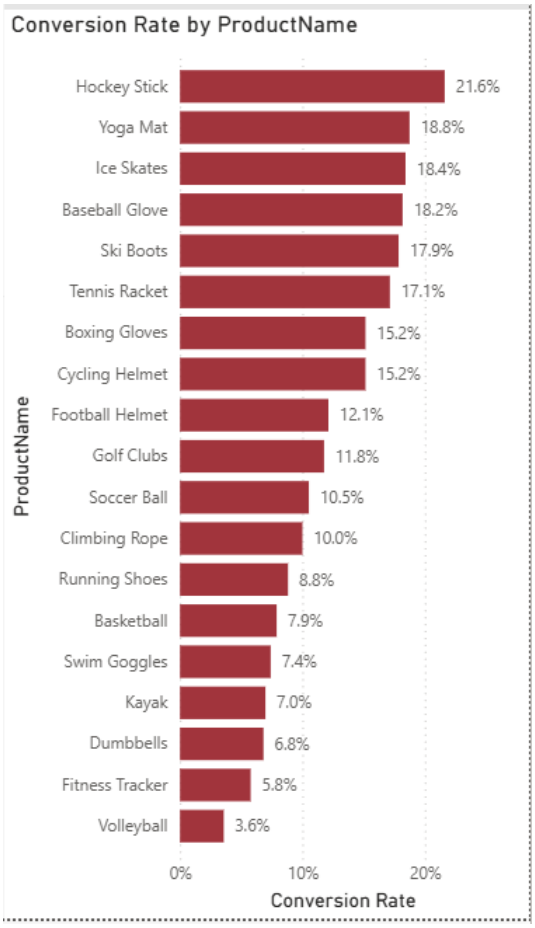
## Conversion Rates

If we analyze the average conversion rates by month, we notice that it starts sharply at ~17% in the month of January, possibly due to marketing campaigns and the holiday season, but it follows a downward trend later on and drops to an average of 9.6% for the year.



Products like Hockey Stick and Yoga mat showed a great conversion rate, so we can follow a similar strategy for the poor-performing products like Volleyball and Fitness Tracker.



I would even want to have a word with the product development teams to discuss what is restraining customers from buying. Is it the price, quality, or something else?

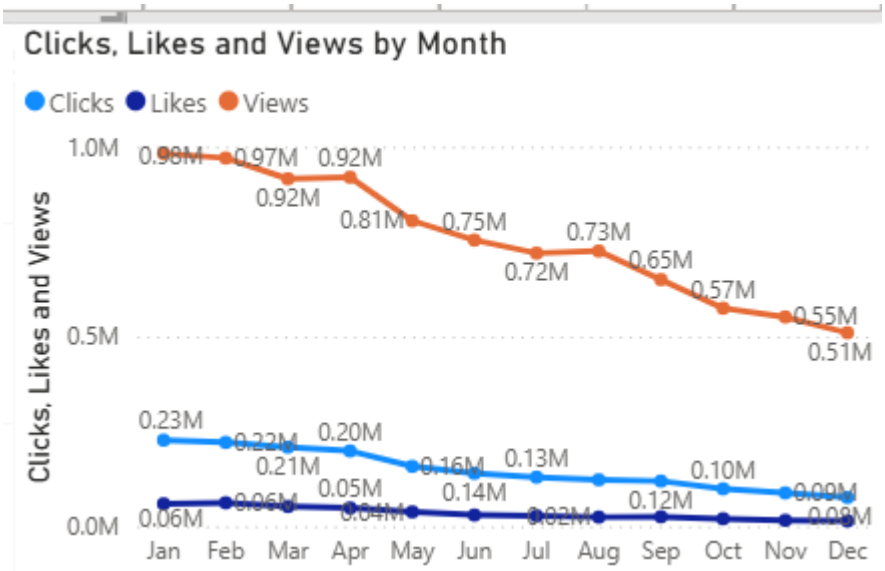
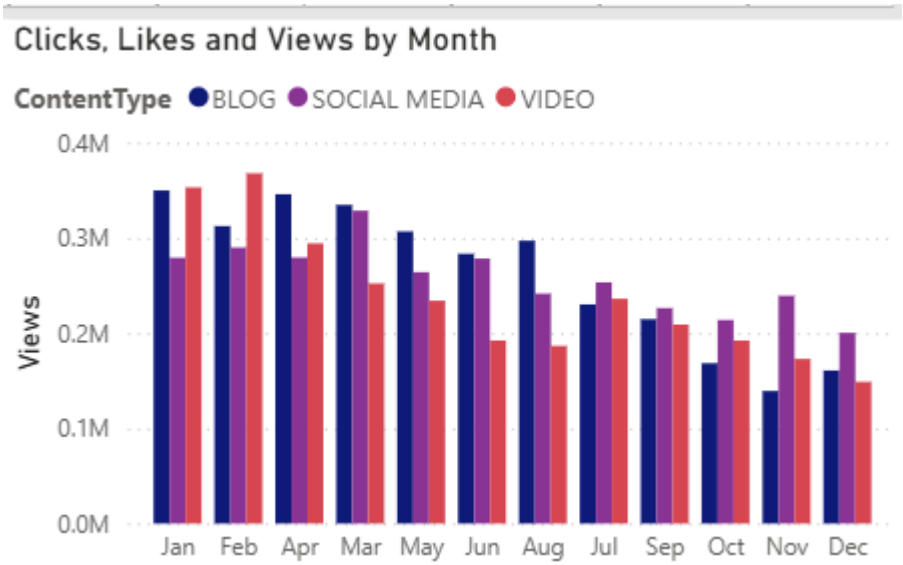
## Social Media

Similar to the conversion rates, the average Views, Likes, and Clicks followed a downward trend after starting on a high in the month of January. Provides a strong indication of a successful marketing campaign in that month.



Blogs has been generating the most amount of engagement across all the platforms. **I would suggest investing more in social media marketing and Video platforms**, since a lot of our target audience is on those platforms (Instagram, YouTube, etc.).)



The Views, Clicks, and Likes ratio is lower than usual, indicating that the content is not engaging.

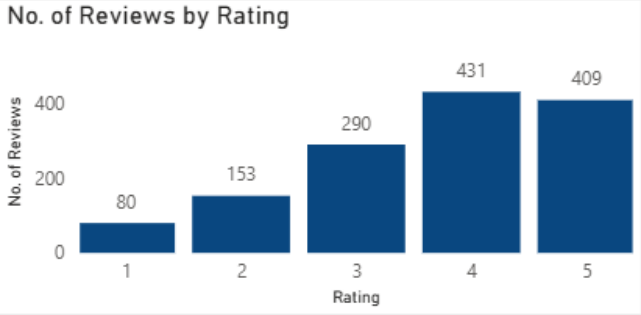
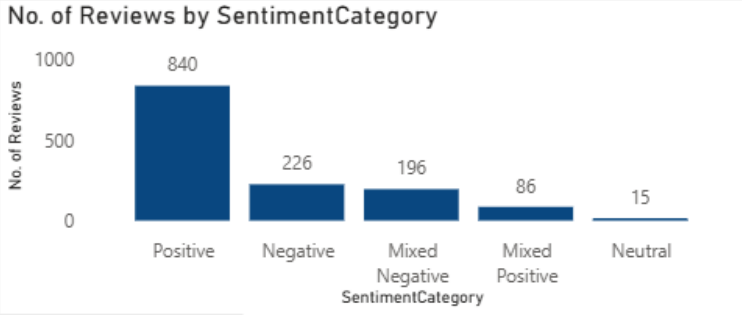
## Customer Reviews

The positive side of the analysis is the reviews. The average rating stands steadily at 3.7/5 throughout 2023-2025.

Most of the reviews and ratings seem positive, with the Yoga mat and Basketball Glove being the best-rated products.





Although there are some Negative and Mixed ratings, which can be studied to improve customer experience.

| ReviewDate | CustomerID | ReviewText | SentimentCategory | Rating |
|---|---|---|---|---|
| Sunday, January 01, 2023 | 46 | The color was different from what was shown. | Negative | 1 |
| Tuesday, January 03, 2023 | 87 | Terrible customer service, would not buy again. | Negative | 1 |
| Wednesday, January 04, 2023 | 75 | Not satisfied, the product broke after a week. | Negative | 1 |
| Thursday, January 05, 2023 | 83 | I had a bad experience with this product. | Negative | 1 |
| Thursday, January 05, 2023 | 80 | Not satisfied, the product broke after a week. | Negative | 1 |
| Saturday, January 07, 2023 | 62 | The product stopped working after a month. | Negative | 1 |
| Tuesday, January 10, 2023 | 21 | Not satisfied, the product broke after a week. | Negative | 1 |
| Wednesday, January 11, 2023 | 83 | Product did not meet my expectations. | Negative | 1 |
| Wednesday, February 08, 2023 | 89 | The product stopped working after a month. | Negative | 1 |
| Friday, February 17, 2023 | 24 | I had a bad experience with this product. | Negative | 1 |
| Wednesday, March 08, 2023 | 6 | The product stopped working after a month. | Negative | 1 |
| Friday, March 17, 2023 | 99 | Not worth the money. | Negative | 1 |
| Saturday, April 29, 2023 | 34 | I had a bad experience with this product. | Negative | 1 |
| Wednesday, May 03, 2023 | 50 | The product stopped working after a month. | Negative | 1 |
| Friday, May 19, 2023 | 30 | Terrible customer service, would not buy again. | Negative | 1 |
| Tuesday, July 11, 2023 | 49 | Not satisfied, the product broke after a week. | Negative | 1 |
| Thursday, July 20, 2023 | 7 | Terrible customer service, would not buy again. | Negative | 1 |
| Sunday, July 23, 2023 | 30 | Not satisfied, the product broke after a week. | Negative | 1 |
| Friday, August 04, 2023 | 8 | Product did not meet my expectations. | Negative | 1 |
| Thursday, August 17, 2023 | 45 | Not worth the money. | Negative | 1 |

## Suggestions

After analyzing, I would like to give the following suggestions to the stakeholders.

1) The January Campaign worked well with Conversation rates and purchases, so keep that running instead of any other campaign.
2) Focus on Instagram and YouTube for the social media campaigns, as we have observed a weak performance across those platforms.
3) Analyze the negative reviews given by customers and try to understand what is causing them problems since happy customers will definitely bring new customers.

I am sure that following these will definitely give you results. I would welcome any additional requests for information or analysis you may require.

Thank you.

Best,

Shubham Trivedi
